- *Benthic foraminiferal assemblages in the Cap de Creus canyon and adjacent open slope: Potential influence of dense shelf water cascading and open ocean convection*

- Publication dans une revue Deep-Sea Research ELSEVIER Part I,136: 31–43 0967-0637
- Resilience, Disturbance, Dense shelf water cascading, Open-ocean convection, Mediterranean, Gulf of Lions
- The NW Mediterranean Sea is subjected to episodically intense events of dense shelf water cascading (DSWC) and open-ocean convection (OOC) that ventilate the seafloor and also have important consequences on organic matter inputs to the seabed and sediment dynamics. The influence of the massive physico-chemical disturbance driven by these events on deep-sea ecosystems is poorly known, and, to date, no information is available on the response of benthic foraminiferal assemblages. To provide insights on these gaps of knowledge, in April 2009 we investigated the foraminiferal faunas along the major axis of the Cap de Creus canyon (at 1000, 1900 and 2400 m depth) and at two additional stations located on the adjacent open slope (at 1000 and 1900 m). The area under scrutiny was hit by intense DSWC and OOC events in winters 2005 and 2006, and during winter 2009 an intense OOC event occurred, with detectable consequences observed at > 1500 m depth.
- We report here foraminiferal faunas characterized by low densities but relatively high levels of biodiversity at 1000-m depth stations. On the contrary, at the deeper depths, very high densities (associated with low organic matter contents) and strong dominance of the disaster species *Uzbekistania charoides* were observed in the > 63 µm fraction.
- The comparison of our results - obtained immediately after an OOC event - to those previously described in spring 2004, before DSWC and OOC events, reveals the presence of largely different foraminiferal assemblages in the two periods. Based on a detailed analysis of the ecological traits of the faunas encountered in the two sampling periods, we suggest that either DSWC or OOC can have a role in shaping deep-sea foraminiferal faunas. Moreover, we contend that, at 1000 m depth, the composition of the foraminiferal assemblages in spring 2009 is suggestive of a resilient stage following the major DSWC events in 2005/2006, whereas the low evenness of faunas at ≥ 1900 m depth is, most likely, the result of the OOC event that occurred in winter 2009, a few months before our sampling.

- *Developing Foram-AMBI for biomonitoring in the Mediterranean: Species assignments to ecological categories*
- Publication dans une revue Marine Micropaleontology ELSEVIER 140 (2018) 33–45 0377-8398
- Euthic foraminifera
- Bio-monitoring Mediterranean Foram-AMBI
- FOBIMO
- Most environmental bio-monitoring methods using the species composition of marine faunas define the Ecological Quality Status of soft bottom ecosystems based on the relative proportions of species assigned to a
- limited number of ecological categories. In this study we analyse the distribution patterns of benthic foraminifera in the Mediterranean as a function of organic carbon gradients on the basis of 15 publications and
- assign the individual species to five ecological categories. Our categories (of sensitive, indifferent and 3rd, 2nd and 1st order opportunists) are very similar to the ecological categories commonly used for macrofauna, but
- show some minor differences. In the 15 analysed publications, we considered the numerical data of 493 taxa, of which 199 could be assigned. In all 79 taxa were classified as sensitive, 60 as indifferent, 46 as 3rd order, 12 as 2nd order and 2 as 1st order opportunists. The remaining 294 taxa are all accessory, and will only marginally contribute to biotic indices based on relative species proportions. In this paper we wanted also to explain the methodology we used for these species assignments, paying particular attention to all complications and problems encountered. We think that the species list proposed here will constitute a highly useful tool for for-
- aminiferal bio-monitoring of soft bottoms in the Mediterranean Sea, which can be used in different ecological indices (Foram-AMBI and similar methods). With additional information becoming available in the next few
- years, it will be possible to expand the list, and, if necessary, to apply some minor corrections. As a next step, we intend to test this species list using several biotic indices, in a number of independent data sets, as soon as these will become available

- third order nonlinear measurement, Z-scan, dark field microscope, phase object
- This study deals with numerical simulations to optimize the parameters in general of the newly introduced Dark Field Z-scan (DF-Z-scan) in a microscopic configuration for third order nonlinear (NL) refraction measurements into thin films. The method allows dynamic transparent nonlinear phase shifts to be clearly visible. The simulations of such images are obtained for very low induced refractive indices. Dark-field illumination requires blocking out of the central light which ordinarily passes through

and around (surrounding) the NL specimen. A table to approximate circular aperture stop size versus magnification will be given depending on the focusing lens into the tested material

- *Madagascar marine ecosystems ecological status: preliminary studies of benthic foraminifera as potential bio indicators. Forams 2018*
- Poster et long résumé Edimbourg – Ecosse Communicant
- Marine ecosystems, Bio-indicators, Benthic foraminifera, Madagascar
- Foraminifera provide a clear evidence of present and fossil environmental changes because they react very quickly to these changes thanks to their short life cycle. In this context, the study of the biodiversity of foraminifera, their ecology and the presence or absence of species sensitive to environmental disturbances, constitutes an important step for the evaluation of the health status of environments impacted by both climatic variations and anthropogenic activity. Within the framework of this study, two sites (Mahajanga - Bombetoka Bay - and Tulear Bay) with growing natural and anthropogenic pressure, were selected and compared according to their environmental characteristics (mangrove, estuary, and coral reef ecosystems). Preliminary data on the first foraminiferal biodiversity census, combined with data on water and sediments quality assessment, allowed the identification of:
 - Mangrove ecosystems (Mahajanga and Tulear), characterized by species adapted to very variable daily and seasonal physicochemical conditions: *Ammonia* sp., *Quinqueloculina* sp., *Triloculina* sp. and *Psammophaga* sp.
 - Bay ecosystems (Mahajanga and Tulear), characterized by infaunal species and epiphytes, according to the type of substrate: *Bolivina* sp., *Ammonia* sp., *Rosalina* sp., *Quinqueloculina* sp., *Triloculina* sp. and *Elphidium* sp.
 - Coral reef ecosystems (Tulear), characterized by epiphyte and epilith species : *Rosalina* sp., *Sorites* sp. and *Amphistegina* sp. Our preliminary results provide the foundations for the development of a biotic index based on bioindicator

species, in order to: 1) identify degraded and resilient sites and 2) advocate appropriate solutions to protect healthy environments and to sustainably improve and effectively implement the management of Malagasy biodiversity. In addition to this study based on morphological data, sediment samples have also been taken to perform molecular identification on foraminifers with high-throughput sequencing and to ease the comparison of foraminiferal biodiversity between the different sites.

Pourret O., Colinet G., Lange B., Faucon M.-P. - UniLaSalle France (AGHYLE)

- *Comportement des terres rares le long d'une toposéquence sur sol latéritique en République Démocratique du Congo.*
- Poster 14ème Journée d'études des sols 2018, Rouen, France.

QUIBAN R., CHANGENET C., MARCHESSE Y., VILLE F., BELMONTE J. - ECAM (LabECAM)

- *Churning losses of spiral-bevel gears at high rotational speed*
- congrès international avec actes Society of Tribologists and Lubrication Engineers (STLE) 73rd Annual Meeting, Minneapolis, Minnesota (USA) poster

QUIBAN R., CHANGENET C., MARCHESSE Y., VILLE F., BELMONTE J. - ECAM (LabECAM)

- *Churning losses of spiral-bevel gears at high rotational speed*
- congrès international sans actes 45th Leeds-Lyon Symposium on Tribology (Leeds) exposé oral

Rhazi L., Ayerdi Gotor A., Thomasset B., Tavernier R., Guillot X., Petit E., Mesnard F. - UniLaSalle France (T&A)

- *Phytosterols and tocopherols variability in Linsed (*Linum usitatissimum*)*
- Poster 23rd International Symposium on Plants Lipids. Yokohama JAPAN.

Rhazi, L., Ayerdi Gotor, A., Gars, M.A., Donot, F., Tavernier, R., Guillot, X., Petit, E., Mesnard, F., Thomasset, B. (2018) - UniLaSalle France (AGHYLE)

- *Phytosterols and tocopherols variability in Linseed (*Linum usitatissimum*).*
- Poster 23rd International Symposium on Plant Lipids :, Yokohama, Tokio, Japan.

Ribeiro T, André L, Pauss A - UniLaSalle France (T&A)

- *Scientific and technical hurdles of solid anaerobic digestion*
- Communications avec acte dans un congrès international ou national 14th International Conference on Renewable Resources and Biorefineries, RRB14, Ghent, Belgium

Ribeiro T, André L, Pauss A - UniLaSalle France (T&A)

- *Solid Anaerobic Digestion: Scientific and Technological Hurdles*
- Poster Biogas Science 2018 - International Conference on Anaerobic Digestion, Torino, Italy

Rosa Maria Alsina - LA SALLE Barcelona (GTM)

- *The DYNAMAP project experience, en el marc del rept 'R12 - Monitorització automàtica del soroll a la ciutat usant una xarxa de sensors (anglès)'*
- II Congrès d'Acústica de Catalunya (ACUSTI.CAT) Comunicació

Rosa Maria Alsina, Joan Claudi Socoró, Sergi Barqué - LA SALLE Barcelona (GTM)

- *Survey of Environmental Noise in the Port of Barcelona*
- Euronoise 2018 en Creta Comunicació

Sarron E., Marier D., Rame V., Le-Dantic L., Gadonna-Widehem P. - UniLaSalle France (T&A)

- *Evaluation du taux de récupération des oocystes de *Cryptosporidium parvum* sur les lanières de salade iceberg et l'eau de lavage selon deux méthodes normées.*
- Poster Congrès national de la SFM, Paris, France.

SIMON S., RIGOLLET C., LOURDIN P. - ECAM (LabECAM)

- *Optimisation des formulations et des procédés de mise en œuvre de feedstocks pour l'élaboration de pièces métalliques par la technologie de fabrication additive MIM Like*
- communication nationale MATERIAUX 2018 (Strasbourg) poster

Tanguy A, Bahers, JB, Aissani L. - UniLaSalle France (CYCLANN)

- *Life cycle analysis of industrial excess heat for district heating.*
- Communications avec acte dans un congrès international ou national Economy, Sustainable Development and Energy International Conference (ESDEIC), Edinburgh, UK

TOURET T., CHANGENET C., VILLE F., ABOUSLEIMAN V. - ECAM (LabECAM)

- *A new expression to estimate the mean coefficient of friction of the gear mesh*
- congrès international avec actes International Gear Conference (Lyon) exposé oral

TOURET T., CHANGENET C., VILLE F., LALMI M., BECQUERELLE S. - ECAM (LabECAM)

- *The influence of micropitting on the friction coefficient of two lubricated surfaces -an experimental investigation*
- congrès international sans actes 45th Leeds-Lyon Symposium on Tribology (Leeds) exposé oral

TOURET T., CHANGENET C., VILLE F., LALMI M., BECQUERELLE S. - ECAM (LabECAM)

- *The influence of micropitting on the friction coefficient of two lubricated surfaces - an experimental investigation*
- congrès international avec actes Society of Tribologists and Lubrication Engineers (STLE) 73rd Annual Meeting, Minneapolis, Minnesota (USA) exposé oral

TREVISAN L., PERUCCIO P.P., BARBERO S. - ECAM (LabECAM)

- *From engineering to industrial design: issues of educating future engineers to systemic design*
- congrès international avec actes 28th CIRP Design Conference, Nantes exposé oral

VAUCHERET A. - ECAM (LabECAM)

- *Determination of gray cast iron age strengthening by non-destructive methods: effect of alloying elements*
- congrès international avec actes 73rd World Foundry Congress, Krakow (Poland) exposé oral

Vincelas T., Colinart T, Hamard E., Hellouin de Ménibus A., Lecompte T., Lenormand H.

- UniLaSalle France (T&A)
- *Light earth performances for thermal insulation: Application to earth-hemp*
- Communications avec acte dans un congrès international ou national International Symposium on Earthen Structures, Bengalura, Inde

VOUAILLAT G., VILLE F., NOYEL J.P., KLEBER X., CHANGENET C., RATHERY S. - ECAM (LabECAM)

- *Analysis of rolling contact fatigue in aeronautic gears*
- congrès international avec actes Society of Tribologists and Lubrication Engineers (STLE) 73rd Annual Meeting, Minneapolis, Minnesota (USA) exposé oral

Walger E., Chirat C., Marlin N., Aussenac T., Rhazi L., Bloch JF., Peyroux R. - UniLaSalle France (T&A)

- *Extraction and characterization of starch from old corrugated containers: a new raw material for biorefinery.*
- Poster 15th European Workshop on Lignocellulosics and Pulp, Aveiro, Portugal.

Wang L., Lenormand H., Zmamou H., Leblanc N. - UniLaSalle France (T&A)

- *Effect of soluble components from bio-aggragtes on the setting of the lime-based binder*
- Communications avec acte dans un congrès international ou national Euromagh biocomposites 2018, Hammamet, Tunisie

Xavier Calvo, Mónica Sánchez-Sepúlveda, David Fonseca, Nick Van der Graaf, Miquel Sans, Marc Gené, Isidro Navarro, Sergi Villagrasa, Ernesto Redondo - LA SALLE Barcelona (GRETEL)

- *Qualitative assessment of urban virtual interactive environments for educational proposals*
- 6th Technological Ecosystems for Enhancing Multiculturality (TEEM 2018) En Salamanca Comunicación

Yacoumas A., Honvault N., Houben D., Fontaine J., Meglouli H., Laruelle L., Tisserant B., Faucon M.-P., Lounès-Hadj Sahraoui A. Firmin S. - UniLaSalle France (AGHYLE)

- *La contamination des sols agricoles par le bisphénol A : une préoccupation de sécurité alimentaire ?*
- Poster SFT

Yacoumas A., Houben D., Fontaine J., Meglouli H., Laruelle L., Tisserant B., Faucon M.-P., Lounès-Hadj Sahraoui A. Firmin S. - UniLaSalle France (AGHYLE)

- *Impact d'un polluant émergent, le bisphenol A, sur la croissance et la mycorhization du blé -*
- Poster 5ème journée francophone des mycorhizes Dunkerque

Yatskul, A., Ugarte, C. - UniLaSalle France (AGHYLE)

- *Soil-tool interaction for an agro-ecological performance of the tillage implements.*
- Poster 2èmes RDV Techniques AXEMA, Beauvais, FRA

Zdanevitch I, Lencauchez J, Duffo L, André L, Ribeiro T, Pineau C - UniLaSalle France (T&A)

- *Roadside grass valorization in anaerobic digestion ("CARMEN" project)*
- Communications avec acte dans un congrès international ou national VENICE 2018 - 7th international symposium on
- energy from biomass and waste, Venice, Italy

Zeghioud H, Khellaf N, Amrane A, Djelal H, Assadi AA, Rtimi S, Bouhelassa M. - UniLaSalle France (CYCLANN)

- *Combining photocatalytic process and biological treatment for enhancing the degradation of a textile pollutant, Reactive Green 12.*
- Poster International conference on environmental pollution, risk assessment and remediation (ICEPRAR 2018), Mahdia, Tunisia.

Proyectos/Projets

- LA SALLE Barcelona (GTM)

- *BUILT2SPEC*
- Europa 2015-2019 148050

Agustin Zaballos - LA SALLE Barcelona (GRITS)

- *Advanced Training in Health Innovation Knowledge Alliance (ATHIKA) Erasmus+; Call EAC/A05/2017 - Call for proposals 2018; Knowledge Alliances*
- Erasmus+; Call EAC/A05/2017 - Call for proposals 2018; Knowledge Alliances 43405-44499 188340
